

===== To Display the names on page load =====

```
// ==UserScript==
// @name      Replace Email Display
// @namespace  http://tampermonkey.net/
// @version    1.0
// @description Replace shaikfiroz838@gmail.com with firoz@intraedge.com everywhere
// @match      *://*/
// @run-at     document-end
// ==/UserScript==

(function() {
  'use strict';
  const oldEmail = /shaikfiroz838@gmail\.com/g;
  const newEmail = 'firoz@intraedge.com';

  function replaceAllText() {
    document.body.innerHTML = document.body.innerHTML.replaceAll(oldEmail, newEmail);
  }

  // initial run
  replaceAllText();

  // watch for dynamic content
  const observer = new MutationObserver(replaceAllText);
  observer.observe(document.body, { childList: true, subtree: true });
})();
```

===== to render the email after clicking arrow button =====

```
// ==UserScript==
// @name      Replace Email Display Everywhere (Gmail Compatible)
// @namespace  http://tampermonkey.net/
// @version    2.0
// @description Replace email text even inside Gmail rendering
// @match      *://*/
// @run-at     document-end
// ==/UserScript==

(function () {
  'use strict';

  const oldEmail = "maheshjangam593@gmail.com";
  const newEmail = "helloGoood@google.com";

  function replaceInTextNode(root) {
```

```
const walker = document.createTreeWalker(
  root,
  NodeFilter.SHOW_TEXT,
  null,
  false
);

let node;
while (node = walker.nextNode()) {
  if (node.nodeValue.includes(oldEmail)) {
    node.nodeValue = node.nodeValue.replaceAll(oldEmail, newEmail);
  }
}

function scan() {
  replaceInTextNodes(document.body);
}

scan();

// Also catch dynamic Gmail loads
const observer = new MutationObserver(scan);
observer.observe(document.body, { childList: true, subtree: true });

})();
```
